Naming Rules for Electronic and Slide Images

As has been announced a couple of weeks ago N4C is adopting a new naming convention for projected images. I would like all to realize that handling the number of images we have at the Club requires quite a lot of time from all the individuals involved (chair persons and N4C rep). So we would appreciate that this naming convention is followed by all members.

The format is: DivisionClass~Image Title~Author's Name.jpg

Note that there's no space or separator between the Division and the Class, and no space around the ~ separators.

Note also that the separators are ~ (spanish tilda: located at the left of the 1 key) and not - (hyphen).

The Divisions are: P (Pictorial), C (Creative), T (Travel), J (Journalism), NZ (Nature-Zoology), and NO (Nature-Other).

The Classes are: A, AA, AAA, M (Masters).

Example:

PM~Mono Lake Sunset~Georges Pelpel.jpg

What we need is to have the image file itself named according to the above convention. Many specify the proper name in the e-mail message but have attachments (images) that have a different or incomplete name. This requires the chair person to first find out who sent the

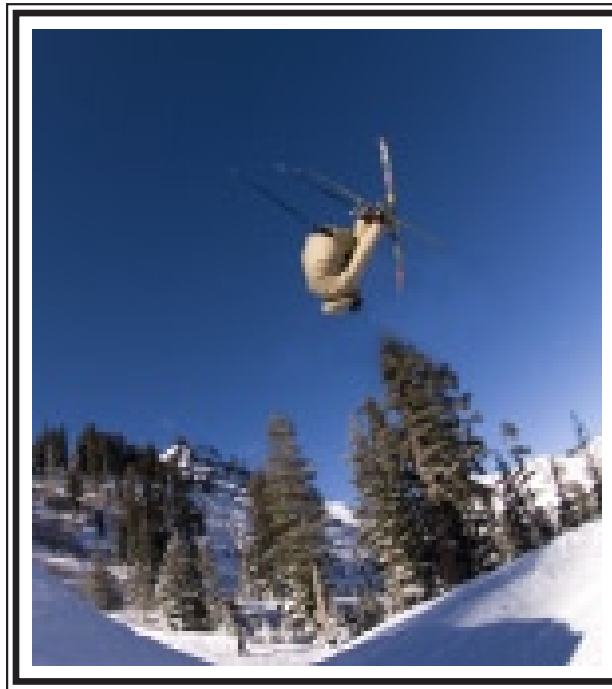

file and, then, rename it. Easy enough when it only involves a couple of images but quite tedious and time consuming when 50 images have to be updated.

Please also make sure that your images have the proper orientation before sending them; a vertical image should be saved as a vertical.

I appreciate your understanding and cooperation.
